

## INTRODUCTION TO QUANTITATIVE GENETICS

D. S. Falconer, *University of Edinburgh*

**Designed for geneticists** and a wide range of biologists interested in the nature of biological variation, this book synthesizes a wealth of previously scattered material. It centers on the inheritance of quantitative differences between individuals—differences of degree rather than of kind—which form the major part of biological variation. The basic theory of quantitative variation is developed, showing what variations can be attributed to genetic and non-genetic causes. Book fully covers the relationships between quantitative characters and biological fitness, the causes of genetic variability in natural populations, and the properties of genes concerned with quantitative variation. 1960. 368 pp. \$6

## BLAKESLEE: THE GENUS DATURA

Amos G. Avery, Sophie Satina, and  
Jacob Rietsma—all formerly of the *Smith  
College Genetics Experiment Station*

A complete synthesis of the genetic investigations carried on for over forty years by Albert F. Blakeslee with several species of the genus *Datura*. The research described constitutes one of the most thorough studies made on a single group of plants—experiments and investigations carried out on the breeding, cytology, morphology, anatomy, physiology, embryology, geographical distribution, and evolutionary history of ten species in this genus. Includes a comprehensive historical review of the *Datura* taxonomy and the only known summary of the *Datura* nomenclature from 1753 to date. *Chronica Botanica: An International Biological and Agricultural Series*, No. 20. 1959. 289 pp.; 317 ills., tables. \$8.75

## MACROMOLECULAR COMPLEXES

Edited by M. V. Edds, Jr.,  
*Brown University*

The 6th Annual Symposium Publication of the Society of General Physiologists presents studies representative of recent efforts to analyze complex macromolecular aggregates—to ask questions about the origin, interaction, and spatial disposition of their components, and to assess the respective roles of each constituent in the properties of the whole. 14 Contributors. 1961. 269 pp., 107 ills. \$7

### Other S. G. P. Symposia

SUBCELLULAR PARTICLES, Teru Hayashi, Ed., with 20 Contributors. 1959. 213 pp.; 122 ills., tables. \$7  
PHYSIOLOGICAL ADAPTATION, C. Ladd Prosser, Ed., with 14 Contributors. 1958. 185 pp.; 90 ills., tables. \$4  
INFLUENCE OF TEMPERATURE on BIOLOGICAL SYSTEMS, Frank H. Johnson, Ed., with 24 Contributors. 1947. 275 pp., 133 ills., tables. \$4.50  
PHYSIOLOGICAL TRIGGERS and Discontinuous Rate Processes, Theodore H. Bullock, Ed., with 16 Contributors. 1957. 179 pp.; 55 ills., tables. \$4  
ELECTROLYTES IN BIOLOGICAL SYSTEMS, Abraham M. Shanes, Ed., with 11 Contributors. 1955. 243 pp.; 123 ills., tables. \$4

## DEVELOPING CELL SYSTEMS AND THEIR CONTROL

Edited by Dorothea Rudnick, Albertus  
Magnus College and Yale University

The 18th Symposium of the Society for the Study of Development and Growth focuses on recent advances in the knowledge of cell differentiation and its control within the organism, from both the biological and biochemical points of view. 10 Contributors. 1960. 288 pp., 125 ills. \$8

### The 16th and 17th Symposia—

DEVELOPMENTAL CYTOLOGY, Dorothea Rudnick, Ed., with 10 Contributors. 1959. 215 pp.; 118 ills., tables. \$8  
CELL, ORGANISM, and MILIEU, Dorothea Rudnick, Ed., with 12 Contributors. 1959. 326 pp.; 136 ills., tables. \$8

*Nobel Prize-winning author*

# THE CLONAL SELECTION THEORY OF ACQUIRED IMMUNITY

by Sir Macfarlane Burnet

This book, the text of the 1958 Abraham Flexner lectures at Vanderbilt University, is an account of the work for which Sir Macfarlane Burnet, together with Sir Peter Bryant Medawar, was awarded the 1960 Nobel Prize in Medicine. It represents an evolutionary approach to the problems of immunity and the antibody response. "Worthy of the serious attention of all students of cellular biology."—*American Scientist*

# AMERICAN JOURNAL OF PHYSICAL ANTHROPOLOGY

Organ of the American Association of Physical Anthropologists  
Published by the Wistar Institute of Anatomy and Biology, Philadelphia

The AMERICAN JOURNAL OF PHYSICAL ANTHROPOLOGY publishes articles on every aspect of physical anthropology: human evolution, human variation and human biology. In particular, articles of significance to all teaching anthropologists, and those of related interest, are presented, such as recent discoveries or studies of fossil man, new evidence on racial distributions and history from blood groups, new methodological developments, and critical surveys of particular problems and fields. A yearly volume of over 500 pages, in four issues, contains about 30 original articles, as well as numerous short comments, preliminary notices, and reviews.

*Subscription* may be had by membership in the American Association of Physical Anthropologists, for which dues are \$10.00 yearly, including the Journal, and *Studies in Physical Anthropology*. Membership is open to professional anthropologists, professionals in cognate sciences, advanced graduate students, and others who have demonstrated interest by publication or professional activity. Application may be made to the Secretary of the Association, Dr. T. Dale Stewart, U. S. National Museum, Washington 25, D.C.

Non-member and institutional subscriptions are \$10.00 a volume, \$11.00 foreign, and should be made to The Wistar Institute of Anatomy and Biology, Philadelphia 4, Pa.

## Annals of Human Genetics

FORMERLY ANNALS OF EUGENICS

Edited by L. S. PENROSE with the assistance of

JULIA BELL	R. A. FISHER	J. B. S. HALDANE	MARY N. KARN
R. R. RACE	J. A. F. ROBERTS	C. A. B. SMITH	

The *Annals of Human Genetics* publishes original articles which describe observations on human heredity or which deal with closely related genetical and statistical problems.

The subscription price of the journal is \$17.50 net  
per volume of 4 parts. Single issues \$5.00 plus postage.

PUBLISHED FOR THE GALTON LABORATORY UNIVERSITY COLLEGE,  
LONDON, W. C. 1

BY THE CAMBRIDGE UNIVERSITY PRESS

32 EAST 57TH STREET, NEW YORK 22, N. Y.

## THE EUGENICS REVIEW

Articles, news items and editorial comment on demographic problems, with particular reference to the biological consequences of measures proposed and adopted for influencing reproduction rates, are published in every issue of the *Review*. Attention may also be drawn to such features as the regular articles on current demographic trends, and to the notices of books, abstracts of periodicals, notes and memoranda and correspondence.

Besides the obvious subjects—such as genetics, birth-control and amentia—the vital statistics of most countries, the national and mental health of England and America, and general biological research in the U.S.A., Britain and elsewhere are briefly but fully reported.

Published quarterly • January, April, July & October

Price 10s. per issue and 40s. per annum post free.

*Free to Fellows and Members of the Eugenics Society.*

The Eugenics Society, 69 Eccleston Square, London, S.W.1

**PERGAMON PRESS, LTD.**

Headington Hill Hall, Oxford

## ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE

(A. Ge. Me. Ge.)

Published as a quarterly from 1952 through 1956, this Journal now appears every 3 months. The Editorial Board, as well as the list of contributors, include most of the best-known names in the field of twin-research, genetics, anthropology and related topics.

The Journal is published in Rome by the Gregor Mendel Institute of Medical Genetics and Twin-research, the founder and Director of which, Prof. Luigi Gedda, is also the Editor of this Journal.

The Editor will be glad to consider for publication manuscripts pertaining to twin-research, genetics, heredity, anthropology and related subjects.

Requests for subscriptions as well as for the publication of manuscripts should be addressed to:

**ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE**

*Largo Amba Aradam 1*

*Rome, Italy*

The yearly subscription price is \$18.00 per volume. A volume consists of four issues. Back numbers may be obtained by writing to the above-mentioned address.

A QUARTERLY BULLETIN in preparation for the  
**SECOND INTERNATIONAL CONFERENCE OF HUMAN GENETICS**  
will be published as a Supplement to the Journal and will be sent free to subscribers or to any interested person.

# THE QUARTERLY REVIEW OF BIOLOGY

Founded by Raymond Pearl

Bentley Glass, *Editor*  
The Johns Hopkins University

**The Quarterly Review of Biology** publishes critical reviews of recent researches in all of the special fields of biological science. Contributions present a synthesis or digest of the researches and a critical evaluation of them.

Theoretical papers are published occasionally, especially when such papers (1) include a critical synthesis of the literature bearing on the theory and (2) are likely to promote further research in a given field.

A feature of the Review is the section dealing with *New Biological Books*. In this department the book literature of different countries in the field of Biology is given comprehensive and critical attention.

*Subscription price:* United States, \$10.00 (\$8.00 to members of the AIBS). Countries within the Postal Union and foreign countries, \$10.75; Canada, \$10.25. Single copies will be supplied, when available, at the rate of \$2.75 a copy, plus \$.25 postage outside USA.

# THE SECOND INTERNATIONAL CONFERENCE OF HUMAN GENETICS

SEPTEMBER 7/12 - 1961 ROME

The Excerpta Medica Foundation, Amsterdam and New York, have agreed to publish in July 1961 a special issue devoted entirely to this congress, containing the abstracts of all papers to be presented.

PRICE: \$5.00

To the EXCERPTA MEDICA FOUNDATION  
New York Academy of Medicine Bldg.,  
2 East 103 Street,  
New York 29, N. Y., U. S. A.

## ORDER FORM

Please send me upon publication ..... copies of the special issue of Excerpta Medica containing the abstracts of papers presented at the 2nd International Conference of Human Genetics, at the price of \$5.-- (or the equivalent in my national currency) per copy.

Cheque enclosed to the  
amount of \$

Please bill me

## TRAVEL GRANT APPLICATIONS SECOND INTERNATIONAL CONFERENCE OF HUMAN GENETICS

THE SECOND INTERNATIONAL CONFERENCE OF HUMAN GENETICS will be held in Rome, Italy, on September 7-12, 1961. Information and Registration forms may be obtained from the Secretariat of the Second International Conference of Human Genetics, Istituto "G. Mendel", 5 Piazza Galeno, Rome. The American Society of Human Genetics has been granted funds by the National Science Foundation and by the U. S. National Institutes of Health for the support of travel of a limited number of the American delegation to the Conference. The Secretary of the American Society of Human Genetics has mailed application forms to members of the Society. Nonmembers may obtain forms from Professor C. P. Oliver, Department of Zoology, University of Texas, Austin. The amounts granted will depend on the number of applications, but probably will not exceed the amount required for air tourist round trip fare to Rome. It was decided by the Society that maximum travel grants would be awarded to persons invited by the Secretariat of the Conference to participate in Symposia and to applicants whose abstracts are approved by the Society Committee on Program Arrangements. Applicants, other than participants in Symposia, who plan to present scheduled scientific papers at the conference are to submit a carbon copy of their abstract to Dr. F. C. Fraser, Department of Genetics, McGill University, Montreal, Canada. The abstracts must arrive on or before April 1, 1961. Persons who will not present papers at the Conference may apply for partial travel assistance; the procedure is explained in the application form.
